TIRO NACIONAL BUDGET

It is not necessary to fill our columns with a long state paper called a 'Veto,' to convey to our readers the last political novelty of Buenos Ayres. Foreigners who know anything at all of our political situation are aware that the split that existed between the Chambers and the Executive has grown to the dimensions of a ravine, and that in the whole body politic of the Republic there is not to be found a Quintus Curtius to leap into the gulf and thus restore the province and the nation to peace and quietness. The time may arrive when the right man will come to the right place, and, instead of jumping into the gulf himself, will save the state by pitching others into it and by a simple stroke put an end to all the political absurdities that afflict this fine country. Great men, they say, come on great occasions. We certainly have the occasions but we want the men. The scandals that are passing before our eyes are unknown to other countries. Our Legislature strikes at the Administration of public affairs by reducing its essential means of existence, whilst our Executive strikes at every sentiment of respect for the law and authority of the land by winking at a military formation in our midst that foments the very dangers we all so ardently wish to avoid.

The Veto of the Provincial Government on the new budget law sent down by the Chambers would read an excellent state paper but for the bayonets of the Tiro Nacional that bristle in our streets and frighten the lives out of the lady passengers in our tram and railway cars; and the sympathy which all good citizens have for Governor Tejedor and his Ministers in their struggle with these Chambers is completely neutralized by the irritation they feel at the Government lending itself to such a dangerous and improper step as the Tiro Nacional business covers.

In every line of this state paper before us we find justice and common sense; and these legislators who passed this budget law are certainly exposed to the charge of seeking by means of seditious economy to upset the Government. The great erudition and political lore that every paragraph of this Veto breathes proves that our Provincial Cabinet have studied from cover to cover, Blackstone, Kent, Story etc. Pity it is that men so profoundly versed in political jurisprudence cannot find in these authors which they so lavishly cite some chapters condemnatory of the arming of the citizens in the midst of peace, and with no banner save party politics.

The Legislature, by means of this Budget law, suppresses the battalion called Guardia Carceles and the rural police; whilst, on the other hand, the Government creates a provincial force called Tiro Nacional, that brigades every clerk in town and turns the very city into an encampment every Sunday and holiday. If the conduct of the Legislature demands the most expressive veto in abolishing the police and the agents for preserving order, possibly the conduct of the Government demands a still stronger public veto for organizing an armed body so calculated to create the very worst of all disorders.

But it is not the mere suppression of provincial soldiers and vigilantes this seditious budget aims at, but the very abolition of the country taxes, since the board of country tax collectors, which it took the Government so much time and trouble to create, is by this new Budget completely abolished. The non-payment of taxes since the world began has been the dream of the people, and the Legislature courts a camp popularity by shutting up the 'colecturias' and sending the directors about their business; but it is not by such measures that our legislators can ever gain public esteem. In former years, when there were no 'colecturias,' the provincial treasury lost millions by frauds, &c.; last year, due to the method and organization of these boards, only $24,700 m/c remained uncollected. With such figures before us the Governor's veto will be approved of by every upright and honourable citizen.

The Excise Taxes were the means counted on by Government to enable it to support several rising industries, but the Budget suppresses them, which deprives the Government of all such power; and the Chambers, according to Governor Tejedor, cannot by a mere negation abrogate these taxes; it must be done by special and express law. The police, which numbered under the previous Government 982 men has been reduced to one-half, and the regiment for guarding the prisons abolished in toto, and turnkeys appointed instead; 21 officers or inspectors are also dismissed. The Legislature has fixed $160,000 m/c for public lighting, when with the strictest economy $200,000 m/c is spent; and the item for caring and shoeing the policemen's horses, that always cost the Government $100,000 m/c per annum, is now abolished in toto. Again, $540,000 is assigned for fodder and keep of horses, when last year it cost a $1,000,000; and $800,000 m/c for police uniforms, which always cost the Government $1,200,000. The present Government, with all its economy, had to disburse in the year $300,000 for telegrams, passages, &c.: the Legislature has fixed this item at only $150,000 m/c, and the item for printing, publications, &c., that last year was $220,000 m/c, is now put down at $100,000 m/c. Postage stamps are also reduced from $70,000 m/c to $26,000 m/c, and public works, that last year were fixed at four millions, are this year down to $200,000 m/c.

These reductions by the Chambers are summarized so:—

Colecturias	$330,000
Batallon Guardia de Carceles	2,631,000
Reducciones en Policia	6,200,000
Contratos de Recision—Newman Medici y Ca	8,000,000
Servicio sobre 10,000,000 de titulos que deben entregarse a los mismos	2,000,000
Leyes especiales	3,500,000
Bonos Municipales impagos 1879	4,500,000
Id id 1880	6,000,000
	$32,161,000

And to the foregoing must be added the following:—

Excise laws suppressed	14,000,000
1 per mil Contribucion Directa	8,000,000
	$22,000,000

Perhaps Governor Tejedor, in preferring to appeal to the patriotism of his fellow-citizens to attempting to carry on the Government on such an impossible Budget, adopts the right course; but we cannot lay aside his veto without thinking that, had there been no Tiro Nacional organisation, there would have been none of this 'presupuesto' blunder, and that if political error is mutual, so also should be the redress.

LATEST FROM ROSARIO

Rosario, 4th Feb.

Grasshoppers and straw-burning threshers, which have been our entertainment during a six days' excursion to the Candelaria and Railway colony wheat districts, will form the leading topics of this effusion, so if your readers do not like the first they can hop or skip it and go in for the threshing. Since our December trip rain has fallen every Sunday and holiday and on an average 9 times a month, but kindly ceased to drop when 'Pike's Peak' got ready for his excursion, and all the time we had glorious harvest weather when one sees

The sun to bed and to arise
Like some hot amourist with glowing eyes.

so if people want to rove in fine weather they had better inquire when we are on the move, to seize the opportunity when neither Macintoshes nor umbrellas will obstruct the carrying of glasses to the mouth and eyes; 'drink to me only with thine eyes' is all in my eye and must have been written by a Good Templar.

The morning of the 27th ult found us bright and early on the box seat of the Candelaria stage, sharing it with M. Jean Baptiste, a hornyhanded son of a hod carrier, who shrugged his shoulder at everything American and affirmed that the Argentine stage-coaches were much smaller than those of Paris. The maize, alfalfa, and garden sauce looked splendid for the first few miles on the route, and we called Jean Baptiste's attention to the height of some of the maize stalks, but he said he had seen much taller growing in Paris, and that the whole blessed Argentine Republic was not to be compared to the 'Faubourg de St Antoine;' after passing the Hiemendahl estancia some buzzards were gorging over the remains of a dead horse and we expatiated on the size and hideousness of the carrion bird to our companion, but he gesticulatingly affirmed that the Parisian buzzards were twice as hideous and ten times as large. We may not have altogether apprehended his meaning, as his Spanish reminded us of a 'down easter' speaking Hebrew with a Tipperary brogue.

On changing horses at Parfait's we learned that all the wheat about there had been threshed and turned out about 4½ fanegas to the square, mostly good wheat, 1200 fanegas of which were deposited in the galpon and for which the owner refused 11½ dollars offered to him by a buyer who had come out in the diligence. Here we were told that the grasshoppers were skirmishing near by, and that in Candelaria they were in great force.

The day being warm Baptiste dozed off to slumber and dream of Paris, and we got interested in Fitzgerald's life of Charles Lever, a grasshopper now and again banging against our blue goggles, when we were startled by Baptiste sputtering at the mouth; we extracted a monstrous grasshopper from his mouth, which the breeze had wafted there when he was snoring.

Before entering Santa Casilda we had counted 82 waggons loaded with wheat going in to Rosario, the average load being 13 fanegas. On arriving at the Administration buildings we found people busy receiving, drying, and despatching wheat. The self binding harvesters were all dismounted and stowed away in cases until the next season.

Don Manuel Castilla, the Administrator, estimates that the average yield of the Candelaria wheat crop this year will be about 4 to 4½ fanegas per square. The flax which was in flower upon our previous visit had seeded and produced a fine full, brilliant grain, which fact has induced various farmers to sow it next season. The active Justice of Peace, Don Jose Garriz, had organized an anti-grasshopper campaign, but as the other jurisdictions have not co-operated in the movement, it is labor lost, for in order to ensure success the war ought to be general and simultaneous all over the Republic, and if the Government does not take steps in that direction the future of Argentine agriculture is exceedingly problematical.

During the reaping season Don Carlos Casado petitioned for several hundred emigrants, to be occupied in harvesting, but the Government, which up to that date had forwarded emigrants from B. Ayres free of expense, to employers, discontinued that practice during the busy season, and now that it is over, it re-continues its former custom, and has forwarded to Candelaria upwards of three hundred persons, principally consisting of women and children, just at the season they are not required. Don Carlos Casado and the J.P. have accommodated as many as they possibly could, whilst the remainder are begging around. People think, Mr. Editor, that it is your duty to draw the attention of the Board of Emigration to this fact, as a great abuse exists somewhere. Emigrants arrive at the colony under the care of nobody, addressed to nobody, and knowing nobody, and the Justice of Peace has to order them back to Rosario, as he has no funds at his disposal to provide for them.

The machinists who were busy on reapers two months ago are now hammering at threshers, some twenty of which are operating in and about Candelaria. The plaza is not so lively as when the many harvest hands were here, but still a few loafers flourish, a gang of whom were gathered around a grocery gloating over the agonized amazement of the Neapolitan Esculapius of the colony, who having dismounted from his horse to visit a patient, had left the animal hobbled in the back yard, where some bucolic wag had tied the horse to a post unknown and unseen by the doctor. On unhobbling and re-mounting, Sawbones was astonished that his hitherto obedient Rosinante would not pass a given point; being short-sighted, he did not see the rope, and raved, spurred and whipped himself out of breath, amidst the guffaws of the jeering crowd, until a merciful hand unfastened the rope, let the victim ride off with his medical spine considerably elevated, brandishing a heavy whip at the scoffers, and bellowing out something awful about cats, although there was not a single representative of the feline race to be seen about the mews; in fact, one of the advantages of Candelaria, as a residence, is the scarcity of cats; one's sleep is never interrupted by their nocturnal muse, and Don Manuel Castilla affirms that in the colony a boot-jack will wear a life-time, and he expects that his will go down as a heirloom to his grandchildren.

We met the doctor in the evening, who informed us that he receives most of his pay in produce, and that he will not sell his wheat until it reaches 14 dollars, and that he has contracted for the sowing of several squares of flax, for which he agrees to pay the cultivators 3½ dollars for all the seed produced; he does not believe in Liver Pads, but intends linseed pouticing suffering humanity 'ad libitum.' On the following day we drove with Mr Ward (not Artimus), the boss engineer of Mr H. B. Coffin, to see the threshers at work. The dog-cart was drawn by a typical mule who seemed to think he had started out for a 5,000 mile run, and did not care about wearing himself out the first day. Grasshoppers were thick as leaves in Vallambrosa, and were going through the maize fields swifter than self-binding reapers. About five miles brought us to a machine which was turning out 80 fanegas per diem of good wheat. The stack was large, and was averaging about 4½ fanegas to the square. Adjoining the stack was an extensive patch of maize and pumpkins. The grasshoppers had stripped the maize stalks bare and were finishing up on the pumpkins, the greater part of which were peeled of the green rind and shone as clear and white as the scalps of the baldheaded duffers who will sit in the pit of the Bowery for the shoeblacks and newsboys in the gallery to drop peanuts upon. We remember once seeing a bootblack drop his opera-glass from the 'gods' on the smooth and glossy pate of a denizen of the pit, said opera-glass being constructed of two soda-water bottles with the bottoms knocked off, and bound together with the cork wires.

(To be continued.)

LATEST FROM PARIS.

(From our own Correspondent.)

The cold is still persistent though a shade less intense, and another fall of snow is anticipated. Misery on misery. Public and private clocks are on 'strike;' they refuse to beat out the little lives of men; every door post has a bundle of straw, resembling the covering of a mushroom-bed, but which acts as protection against the freezing of the gas meter; the spectacle recalls the Commune, when the air-holes of the cellars were hastily stuffed to prevent petroleum being poured in. Much of the snow has been carted away, but in some places it is shaped into tables and made to do duty as stalls. The coal merchant's 'ring' has been denounced; they ran up prices to 120 fr. the ton; there is no stint of coal at the railway terminuses, only theroads to them are all blocked with snow. Since the old stick-in-the-mud War Minister, Gresley, has retired to his flannels and warm drinks, the military have been called out to compel the snow to raise the siege. The Seine is now abandoned to promenades and slides; people talk of holding a fancy fair on it to collect funds for the poor; at present a wine shop has been opened and a few cooks make 'gauffres' and pan-cakes. Game never was so plentiful; at many street-corners heaps of birds, hares, rabbits etc., are for sale; they are the victims of the cold in the suburbs, and constitute very questionable eating. The flower, like the vegetable markets are closed; the former, often gay at this period, opened a few booths at the Madelene, to supply Britishers with their holly and ivy. And only think that at Hyerés, some 36 hours distant from Paris, people sport like sirens in the sea, breakfast in the open air, and only close windows at night. The Artesian well at Passy being 30 degrees warmer than the air, is surrounded by a cloud of vapor suggesting the Geysers of Iceland. Buffon maintained, that where man habitually dwells, the temperature of the place will be relatively elevated, and that the fires in the wealthy part of a city will augment by a few degrees, thanks to a favouring wind, the temperature of the poor's quarter. Farmers are reported to rejoice at the present inclemency, as it kills noxious insects, etc.; no such thing, according to the Academy of Sciences, whose Magi have justly stated, the greater the cold, the deeper the noxious insect burrows in the soil, and M. Pasteur adds, even disease germs cannot be killed off under 45 degrees c below zero, or the temperature peculiar to the North Pole.

The new Ministry will have for their 'chef' M. de Freycinet, a moderate, but a namby-pamby republican; his colleagues will be men acting up to the motto, 'be just and fear not.' Many timid souls believe France is on the road to destruction because at last the Republic dares to be Republican. On the contrary, the situation requires a Minister, who, while being conservative, will not be the less resolved to bring to an end six or seven important questions, hanging like Mahomet's coffin since five years. A great fuss is made because M. Gambetta will not quit the important position he occupies, educating the Chamber in 'parlementarisme,' for the secondary role of prime minister. De Freycinet is his man, and with a loyal programme, the majority of the Deputies will follow like the 'moutons de Panurge.'

M. de Freycinet is a civil engineer and during the invasion was Gambetta's War Minister, a post the Germans testify he filled with distinction. He looks 65 years of age; is tall; coat closely buttoned up, and the incarnation of a serious business man. He is not an orator; when he speaks he leans forward on the tribune, and in a monotonous manner delivers his observations as a scholar would repeat his lesson. General Farre is a guarantee that favoritism is henceforth abolished in the army, and reforms cease to be a dead letter.

Challemel-Lacour is a man of rare ability and energy; hardly had he terminated his brilliant course of studies, than the late Emperor sent him into exile at 21 years of age; he resided in Belgium, Germany, and Switzerland; on the sinking of the Empire he re-entered France a white-haired man, 'the snow of exile' as he called it. In 1870, as Prefect at Lyons, he prevented civil war breaking out by his eloquence; ultimately he was made deputy, senator, and recently ambassador to Switzerland where he lived so long in exile. He is a powerful writer and was associated with Gambetta in the *Republique Francaise*; it was in defending one of his friends' contributions in the *Revue Politique* on the Bandin subscription, that Gambetta delivered the famous philippic which shook the tottering Empire to its base and made himself a celebrity. M. Challemel-Lacour has one weakness, he is a bookworm, and his cherished occupation is the re-reading of old masters, no matter to what country they belong.

There are not many 1848 'trees of liberty' in France; yet at Joigny some non-commissioned officers cut down one, and have been sent before a court-martial. On Christmas Day, 30 ladiee had their pockets picked in one of the fashionable churches; a scavenger found the empty purses in the street tied up in a piece of stuff.

EDITOR'S TABLE.

Carnival begins to-day at 2 o'clock sharp. In Calles Florida and Victoria some few arches of gas piping have been thrown across the street, but in the way of general decoration there is little to be seen. However, flags and flowers enough to make things look gay will probably appear to-day. The Corso will follow the usual route from Plaza Lorea through Victoria, Bolivar, Rivadavia and Florida to Plaza Retiro and back again. Seventeen comparsas (many of ladies) are ready for the fray. The Chief of Police issued yesterday the usual edict against 'Agua'—fine and imprisonment for any infraction. We hope all *Standard* readers will enjoy themselves, and respectfully bid them 'au revoir' till Thursday morning.

The disputed conference between the President and Governor Tejedor turns out to be all gammon. There has been no such conference, nor is there any likelihood of it.

The R.M.S. Guadiana, the Sud America, Bessel, Nestorian and Teniers sailed yesterday, Not for a long time have the mercantile and shipping fraternity had such a busy Saturday. The passengers had a beautiful day for going off—little sun, nice topsail breeze, smooth water, etc. 'Bon voyage' to everybody.

Several parties left last night in the river steamer for Montevideo, to pass Carnival down there, where a coach for the Corso only costs three pats. instead of the outrageous prices current in this city. To judge by the Mount papers, Carnival down there promises to be brilliant so far as gas and decorations can make it so.

We read in the papers a most extraordinary version of the part which President Barreiro of Paraguay is asserted to have played in the trial of the murderers of the late President Rivarola. President B. is accused of threatening to 'do for' every man on the jury if a verdict of Guilty was returned, and 'Not guilty, my Lord,' was, consequently, the finding. We were not aware that Paraguay enjoyed the blessing of trial by jury in criminal cases, but if the above report has any foundation, it is a blessing in the very thickest of thick disguises.

The theatrical bill of fare for next winter is already published—Italian opera at the Colon and the Opera House, Monster Circus troupe at the Politeama, French company at the Variedades, Spanish ditto at Alegria, and Italian ditto at the Eldorado.

The *Pueblo Argentino* has made a truly stunning disclosure in reference to some of the bazaars recently got up with so much 'eclat.' Our esteemed contemporary asserts positively that the 'charitable object' in view at one given on the 3d inst. was nothing more or less than the purchase of arms for purposes which are well and very unfavourably known the peaceable section of the community. It will certainly be the next thing to a miracle if all this playing with fire end harmlessly.

The town of Mercedes is always well to the front whenever anything affecting the best interests of the country is in question. We perceive with pleasure that the Municipality of that town has already named a Committee and voted a small sum for preparations for the Exhibition in September. The Committee includes Messrs Nicholas Lowe, M. Fresco, J. B. Parodi, A. Nogues, N. Ramognini, L. Lomban, Juan Elordi and C. Burnel.

The Italians are getting up a subscription similar to the Irish, to relieve distress at home. We have to thank the *Nacion* and other colleagues for their kind support of the letter addressed to them by the President and Secretary of the Irish Relief Fund.

Should any of our readers fall short of 'pomito' ammunition during the Carnival warfare, they have only to drop in to the Bazaar Ingles. No. 189 Florida, right in the centre of the field of battle, where Gosnell's best can be had at the very low price of 30$ m|c. per dozen.

Mr. Soot, agent for the greatest living Wizard, Count Patrizio was kind enough to send us his card yesterday, announcing the approaching arrival of the Count and Countess. Count P is a real Count, and, from his name, we inter that his ancestors hailed from the 'first gem of the sea.' We are prepared to give His Excellency 'Cead mil faltha,' on or ot 'Change.

The duelling mania which has been so rife in this city lately ended yesterday morning in a sad catastrophe at Palermo, where Col. Mansilla and Mr P. Gomez met, and the latter was shot dead, his adversary's ball piercing his heart. The distance was ten paces. At the third clap of the second's hands both fired: no effect: A second shot gave the same result, but the third was fatal to Mr. Gomez. It is to be hoped that this truly shocking affair will lead to some vigorous measures to put down the practice of duelling, one alike condemned by the laws of God and man.

The Half-yearly General Meeting of the Buenos Ayres Rowing Club took place on the 28th ult., when the following officers for the in coming year were elected:—R. Bridgett, President; W. H. Ford, Captain; R. H. Murray, Deputy-Captain; H. P. Tupper, Treasurer; H. R. Rodgers, Secretary, and S. Alcorta, A. Coelho, R. M. Ramsay, J. C. Simpson and D. Mackinnon committee men, while Messrs. R. M. Ramsay and R. Bridgett were named Trustees for the Reserve Fund. The club continues in a satisfactory position, having 235 members enrolled on the books, and several new members have joined since the beginning of the year. The funds in hand are sufficient for any extra expenses that may be incurred, there being a balance of $24 436 m|c. The meeting concluded by passing a cordial vote of thanks to the Rev. Jas. Smith for his kindness in again giving the use of the Scotch Church School-room.

The mails from the Interior yesterday were, as usual, not over lively or newsy. In Cordoba the B. Ayres election of Sunday last is said to have caused a 'disagreeable impression.' From Santiago there is a lot of news, but that city's only paper, the *Prensa Libre*, is so execrably printed that we cannot read one line of it, and our heart bleeds for the eyesight of its subscribers if it has any. From Tucuman, the news is that the people up there are 'muy agitados,' and most of them suffering from 'delirium electioneermeus.' A new market was opened there last week. From Salta the death of Dr Barnaby Lopez, a very distinguished citizen, is announced. In San Juan the Cuyo Bank declared a dividend of 5 per cent, and there is much talk of a French joint-stock company being about to undertake mining operations on a large scale in that province.

We are requested to announce that the United States Consulate will be closed to-morrow and on Tuesday.

There will be no service to-day at St. John's Anglican Church, in consequence of Carnival.

WHEAT-GROWING 'AD INFINITUM.'

Mr Editor,

In to-day's issue of your journal I notice with much pleasure that another contributor, 'B.R.,' has taken up the matter of Mr Dillon's New Year's Gift to the President of this Republic, wherein the Commissioner General invites inquiry into the subject of continuous wheat-growing on the same soil and from the same seed. 'B. R's' letter shows that the raising of this question in your paper has not been done in vain and that at least one thinking mind has appreciated the few remarks I made concerning it in my letter of the 8th inst: I therefore trust that your readers will not reproach me with being affected with a certain complaint at which Juvenal hints in saying:—

Tenet insanabile multos
Scribendi cacoethes.

My object is simply to continue exciting public interest in this most important matter by observations based on facts and matured by experience, in order that those interested in the cultivation of wheat may more especially benefit by it.

In my late rambles in different parts of this province extending to Chivilcoy, Junin, Lincoln, Bragado, Domselaar &c., I have paid especial attention to the grains grown there and found,

Some good, more bad, some neither one nor t'other.

In fact the good had been grown on almost newly broken soil, whilst the bad and the indifferent were the produce of exhausted lands *i. e.* ground abused by continuous cultivation of the same corn on it. In speaking to one of the farmers who showed me what he termed 'a fair sample' of wheat, (which, however, I should consider was not weighing 42 lbs a bushel and therefore would be poor) I suggested to him the manuring of lands to obtain better results. He laughed, and asked me where I thought he should get the manure from? I noticed the sheep and cattle in their pens close by the homestead, and drew his attention to the fact that there was an enormous accumulation of manure, which, mixed with the straw (almost reduced to chaff by the primitive way of thrashing by means of mares' hoofs) would make a fair manure. He smiled again and drew my attention to the fact that he could not spare this as it was his fuel for the winter, nay, for every days use. I was rather baffled, but nevertheless I asked one more question. And what do you do with the bones of the animals you kill, and what with the ashes of your fire? He replied the bones we also use as fuel and the ashes of both we throw into ditches and cover over. And here he showed me behind his house various pits nearly filled in with such refuse, and others which had been covered over from time to time. I had learnt something new to me and left my friend still smiling, no doubt inwardly rejoicing that he had taught me a wholesome lesson, concerning 'political economy.'

To another man in Lincoln, who seemed to be fully aware of the state of affairs as far as the quality of his wheat was concerned, and who possessed a great array of steam machinery, I suggested the breaking up of new plots for wheat-growing. But, he seemed to dread the idea and was under the impression that it was only the 'season' that made the grain poor and light, would not believe in anything else, as he had grown maize for a much longer period on the same soil without change or without allowing the land to lay fallow, and always had an average crop.

I have also had the satisfaction of meeting with one or two sensible and practical men, who had not learnt their rudiments of farming in this country, and who are therefore fully aware of what is needed in wheat growing, and strive to employ it. I am convinced of their ultimate success. One of them, unfortunately, has had his crops destroyed by the locusts plague two or three successive seasons.

I fear, Mr Editor, that the great majority of those immigrants whose advent here you so very often hail as the arrival of so many more wheat-growers, are men who never have seen a wheat field in their life before. They would in all probability be more at home in the irrigation of land for the cultivation of rice, or the tilling of Indian corn, than grain of any other kind, I fear any remarks here would be made in vain to them.

If the Government wish to aid the wheat-growing classes more directly, let them revert to the 'ruse' of Franklin, who had recommended the higher cultivation of the soil to his countrymen, by the use of fertilizers, drawing their attention to the useful application of gypsum as such, and when he was laughed at, had mixed with cloverseed a quantity of gypsum to be sown in the midst of a field near his residence on the high-road. In time the clover spread, and where the gypsum had been mixed with seed sown, there appeared in dry luxuriant green the words 'Here is Gypsum sown.' The difference was so apparent, that everybody in future used gypsum as a fertilizer for the production of a good clover crop. I say, therefore let the Government of every province set apart a small plot of land to solve here by science for the benefit of the people, what Nature has done in the estuaries of many great rivers, and what scientific men have succeeded in accomplishing elsewhere. Practical example would go farther than a hundred theories.

Having kindly inserted the letters of two R's, allow me to introduce to your notice the now everywhere indispensable third one, I mean the one that stands for 'rithmetic.' It may be of use to some of your readers who look upon the other cultivation of their soil from a loftier point of view than that of the mere mechanical part of sowing and reaping.

(To be continued.)

The gold market ruled steadier than yesterday; prices opened at an advance of five cents., but dropped to 31.40, closing at 31.45. The cash sales amount to 14,000, and for the end of February 115,000. There was a very strong push made by the bulls to keep up rates, but outside gold was freely sold by merchants who needed the paper money to pay for produce. The political state of the country is the only thing that keeps up gold. All the talk about the presidential conference has amounted to nil. Neither President nor Governor seem to have taken any steps whatever to bring about a reconciliation, and the duel to-day served still more to embitter the question. At noon nothing else was talked of on 'Change. In the multitudes of duels of late, this, at last, has proved a very sudden and severe lesson. At the fourth shot Colonel Mansilla lodged his bullet in Mr Pantaleon Gomez's heart, and the funeral, we understand, comes off this evening or to-morrow morning. The duel came off in a field on the Calle Santa Fe.

In Cedulas not a single operation, either on time or for cash. In Treasury Bonds a few sales at 75⅝. In other stocks nothing.

Exchange closes at yesterday's rates, 49⅞ and 50d. The Provincial Bank took to-day but at its own rates 50½ and 53½, which are in advance of those of the market.

The clearing of the mails was a very heavy business, and both French and English mails were closed on the same day, which is not usual.

The Guadiana went very full; she took 25 sisters of Mercy of the Irish Convent, that leave the Plate to settle in Australia, and a small steamer from the Boca took the nuns off.

As will be seen by the telegram in another column the news from Manchester is good, and merchants say that many articles are selling dearer in England than in the Plate. The general improvement in trade in England we are happy to say continues.

The mole at ½ past 2 o'clock was crowded to see the passengers by the mail off. Messrs. Dalglish & Thompson were enveloped in friends.

The payments on 'Change for produce were very heavy, all the tables crowded, and the scarcity of paper money much complained of.

The Vandyck, with dates from Antwerp to 11th, entered Montevidéo to-day; mails up to-night.

Brokers, merchants and clerks all leave town this evening in every direction to amuse themselves during Carnival. A strong party holds the Tigre and San Fernando, and many go down to-night to Montevideo.

Mr Bemberg, who has returned from Montevideo, was welcomed on 'Change.

The gold sales were:—

The Italian barque Padre Tomasso entered Montevideo on 4th; she sailed from Buenos Aires for Europe on the 10th January, but encountered a severe storm about 600 miles out. She had to put back for repairs, and her cargo must be discharged.

The sale of 4000 salted ox hides, 61 lbs, at 48½ rls, saladero San Nicolas, is reported.

Also 2000 cow, 50 lbs, at 50½ rls.

Also a cargo of tallow at Gualeguay 13 9/16 on board.

Spanish brig Ana chartered to load beef for Brazil at 5, 6 and 7. Also same terms Spanish polacre Dorotea and German barque Jeanette to load tallow in Gualeguaychu for Stockholm at 32s/6d in full.

The Don Pedro has brought a splendid assorted cargo to the Plate, and about 5fts 5000 in gold to Theobald, Montevideo.

The arrivals of wool up to date from the camp are marked at 4,435,000 arrs, and total sales 3,445,000 arrs, against 3,880,000 arrivals and 3,380,000 sales same time last year. The arrivals for the fortnight however only reached 385,000 arrs, and the sales 315,000 arrs. Stock estimated at 990,000 arrs, which is a large stock enough at this time of the year. The shipments to the States this season reach 1660 bales, against but 49 bales last season, and 9000 bales to Germany, against but 6000 last year.

Gold at after-hours ruled sellers at 31.50, no buyers.

It was announced at 4 o'clock that a preliminary meeting is to be held to organise a general move on the part of the whole commerce of B. Aires to demand of both Governments a general disarmament. This news was well received on 'Change, and meets with the very fullest support of merchants.

Messrs Peyredieu & Bradley sold to-day:—
500 ar. good wool at 108
100 bellies at 78

The holder of the only cargo of salt in the market asks 10½ rls., not sold.

The Transandine Telegraph Co. is about to declare another extraordinary dividend, and after that a regular dividend; the best stock in this market.

We extracs from Mr MacLean's register of exports the following:—

Feb. 6th—Pernambuco. Loraine, British, 6,677 bags bran.

Feb. 7th—Antwerp. Giacomino, Italian, 807 bales wool, 310 bags guano, 52 bags maize.

"The following vessels have recently left port—

"Canadian barque Bessie Simpson for Cape of Good Hope.

"Norwegian barque Gogla bales for Havre.

"American barque Emma C Litchfield in ballast for Rosario.

"Owing to very low tides, I have been unable to send you any maritime news connected with this port these last few days, but I hope you will excuse me, as there was really nothing on the cards.

"The mate of the Emma C Litchfield was treacherously stabbed on board by one of the crew, an Austrian, and is now in a precarious condition in the English Hospital. The Austrian escaped, and has not yet been handed over to justice.

"To-morrow, weather permitting, we make tacks as 'Jolly Tars' and bring up in the Calle Florida, where we go through a three days ordeal of being stared at. Knives not being allowed, we shall be ready for the attack with large-sized pomitos at our Lanyard's end."

The public interest in the resumption of the City Improvement Works is every day on the increase. The following is the proposed scheme of Messrs Tiselles & Co., and the whole market hopes to see it accepted and carried out:—

B. Aires, Dec. 11th, 1879.

The undersigned beg to propose to Government to complete the City Improvement Works, on the following conditions:—

1st—The second Series of the Popular Loan to be increased to 170 millions currency, at 8 per cent interest, 4 per cent payable every three months and 4 per cent in prizes and 2½ per cent accumulative amortization:

2nd—The Government and the undersigned to determine how the prizes shall be distributed.

3rd—Scrip to be in Bonds of $1,000 m|c., with such subdivisions as may be agreed on.

4th—The Public Lands and the receipts from the Improvement Works not previously hypothecated to stand as guarantee for this loan.

5th—The money received shall be lodged to a Special Account in the Provincial Bank and under no pretext whatever shall it be applied to any but the purpose intended by this Bill.

6th—The Bank shall take charge of the service of this loan, debiting the Special Account, which must be closed annually, and if there be a balance against Government, the latter must pay it within 90 days.

7th—The undersigned agree—

1st—To construct, within 2½ years, to commence 3 months after their proposal is accepted, the works laid down in the Law of 7th Nov., 1878, and for the cost therein specified.

2nd—To accept in payment Popular Loan Bonds of Series B at 90 per cent of their written value, deducting ten per cent for expenses and commissions which shall be defrayed exclusively by them.

3rd—To deliver monthly one 30th part of the whole works, and perhaps more.

4th—To give whatever guarantee the Government may require as security for the contract.

8th—The Executive to give within the first 3 days of each month a certificate of the works received.

9th—The Executive, on the said certificate being presented, shall hand over Popular Loan Bonds with coupons from date of issue, to the amount of work done.

10th—The undersigned, in addition to the specified works, will also connect private houses with the drains, charging the owners the same scale of prices as charged to Government.

11th—During the first year of the works the Bank shall accept Series B Bonds in payment of our obligations up to 3½ millions monthly, at 10 per cent under the issue price, charging us on such loans the same interest and amortization as on "pedidos industriales". After the first year the Bank can accept or reject the Bonds in payment, as it may think fit.

12th—The Water Works Board shall be obliged to hand over to us at its own cost all the tools and building materials it has which we may require, taking in payment Bonds at 90 per cent.

13th—Should civil or foreign war interfere with the execution of this contract, the works shall be suspended while the cause of interruption exists, should we so demand.

14th—Any amortization, interest and prizes which are not claimed within two years after due date shall fall to the undersigned.

15th—The Executive binds itself to issue no other loan while the works are in progress.

16th—All questions to be decided by arbitrators, one for each side, with power to both to call in a third, whose decision shall be final.

There will be no Bolsa until next Wednesday, but Mr Beccar will put up on his board any telegrams that may come, and the gates of the Bolsa will be open each morning to allow access to the Reading Room upstairs.

The Commercial Judge of Montevideo has embargoed the property etc. of Mr R Pealer, who, we believe, is at present in the United States.

The *Telegrafo* says that many of the Montevidean members of the Comision Central, formed for the Argentine Continental Exhibition, have resigned.

The Italian steamer Sud America takes a good wheat consignment from Montevideo for Genoa, shipped by Mauersa & Co.

Messrs Gandolfi and Moss, in their interesting circular for the mail give the following—Imports have not been as active this fortnight as in the previous one. All the stores in the country and up the rivers are well stocked, and thus the purchases for the present are limited. The store owners no longer over stock their premises, and carry on their business now on a more limited basis. The business therefore, at present is slow and uniform. Many are awaiting a greater fall in gold and the decision whether the present heavy taxes on alcohols and tobacco will be continued. The Chambers already have decreed their suspension. There has been activity in Catalan and French wines, sugar and rice. Exports are active, much wool has been shipped and the saladeros have made important transactions. All the liens of the present month is already sold. The political situation is the same, both parties are arming to decide the question with violence. Commerce nevertheless trusts in a peaceful solution of the question. This confidence is eloquently shown in the fall in gold of 1¼ per cent. This fall is much due to the prudent manage ment of the Provincial Bank and the Provincial Finance Department.

The sale of 8000 ar. of Concordia wool at 3.80 in Montevideo is reported, also 40,000 ar. in one lot from our own deposits; wools rule strong and active.

German brig Amalia chartered in Montevideo to load beef in San Nicolas, 4½, 5½, 6½ and 5 o/o for Brazil, also an Italian barque to load hides for Dunkirk at 15 frs. in full.

The steamer Rio Janeyro, arrived yesterday at Montevideo from Rio, was sent at once back by the Montevidean port authorities, owing to the death of a passenger and sickness of others.

The consumption of meat in this city is larger than in European cities five times its size. We have not as yet the returns of sheep consumed, but the following figures show the cows and calves killed at the Corrales each month:—

All the old iron in the world seems to be going to the U. States as appears by the following—

Philadelphia, Jan. 4th

"It is estimated that 275,000 tons of pig iron, 175,000 tons of old rails and old iron, 50,000 tons of rails, and 300,000 tons of iron ores were imported into the United States in the year 1879, chiefly during the 1st half of the year; 50,000 tons of steel blooms and bar amounts of ores are yet to arrive on outstanding contracts. The importation of ores for the year 1880 is anticipated to reach 500,000 tons. The consumption of pig and old iron in the U. States during 1879 is estimated at 3,250,000 tons, against 2,373,276 in 1878, while the consumption for 1880 is expected considerably to exceed that of 1878. Prices advanced 67 to 06 per cent during the year 1879.

"The Maine Supreme Court has answered the questions submitted to it relative to the political complication gene ally favourably to the Republicans. Four members of the Legislature who were counted in by the Democrats refuse to serve, so that there are indications that they will not have a quorum. The crisis will come on Wednesday when the Legislature meets. Maine bonds have declined 3."

It Cleanses and Improves the Growth and Quality of the Wool

It Mixes Freely with Cold Water, without Preparation.

It is a Domestic Disinfectant.

Copy of Analysis by Professor Kyle.

National College, Buenos Ayres, November 29th 1879.

Messrs. M. Forrester & Co., Buenos Ayres.

Gentlemen—I have at your request made a careful examination of he sample of JEYES'S SHEEP DIP you handed to me on the 18th inst. I find it to be a well made preparation of Phenols and other Tar products, combined with soap, retaining the liquid form and easily mixible with water, from which it does not afterwards separate.

The proportion of active ingredients amounts to rather over 80 per cent it is free from Mineral Poisons and from Caustic Alkalies. In my opinion it is well worth the attention of Sheepfarmers, and will be found by them to be convenient, safe, and I do not doubt, very efficacious as a Sheep Dip. From the readiness with which the preparation can be mixed with cold water it ought to prove most acceptable as a domestic disinfectant, being more convenient than crude Carbolic Acid or the disinfectant powders so frequently employed.

I am, Gentlemen, your obedient servant,

JOHN J. J. KYLE, Professor of Chemistry.

Extracts from Testimonials

From Mr. Alex. Stewart, Bailiff to H. D. Pochin, Esq. Rodnent Hall. Wales—

"The Sheep Dip is the best that I have ever used. I have not seen a single Maggot on any of the Sheep since we used it. The wool looks beautiful, and to all appearance improved in quality. I feel satisfied it will be an invaluable boon to our large Sheepfarmers in the Colonies, and it only wants to be appreciated."

De todos los Antisarnicos hasta ahora conocidos.

ESTE ESPECIFICO es libre de veneno y se disuelve al momento y enteramente en agua fria; puede ser empleado en cualquier estacion del ano. Ha alcanzado ya tal fama en esta Provincia que es casi el unico remedio empleado en los partidos de Chivilcoy, Mercedes, 25 de Mayo, Chacabuco, etc. Viene en tambores y cascos y se usa mezclado con 100 partes de agua.

TODAS LAS PERSONAS que han usado el Fluido Little estan contentisimas con el, como se vera por las cartas recibidas por los Agentes de los Sres. E. Casey, Eugenio Keenan, John O'Connor, John J. Gahan, George H. Scott, Michael J. Kearney, Luke Rooney, John Brown, E. Garrahan, Henry Saint John Forsaman, Alejandro J. Garcia, Benito Orisol, etc.

EL PROFESOR KYLE en una carta fecha 17 de Febrero ppdo. dice—'Juzgandolo de un punto de vista quimico, con la mayor confianza puedo recomendar a los Estancieros el Antisarnico Little, y no tengo la menor duda que dentro de poco sera el favorito para la cura de la sarna, etc.

Muy importante para el Publico.

Poseido de la mayor ansiedad, y con el debido respecto al Publico, apelo muy encarecidamente a toda clase de personas, para que se dignen prestarme su apoyo, dando a conocer como tales las malas y aun peligrosas falsificaciones de mis medicinas, hechas principalmente en Nueva York, de que tengan conocimiento.

Especuladores nada escrupulosos adquieren esta broza a un precio sumamente bajo, y la venden como si fuera mis genuinas pildoras y ungüento, logrando con esto reprobado trafico una enorme ganancia.

Ninguno de los expresados medicamentos son genuinos, si no llevan en el rotulo de cada bote y caja la inscripcion siguiente: Holloway's Pills and Ointment, 533, Oxford Street, London, y el sello del Gobierno Britanico, con las palabras Holloway's Pills and Ointment, grabadas en el.

Las personas que tengan la bondad de informar de algun traficante que venda las enunciadas medicinas falsas, seran muy bien remuneradas, y nunca, ni en circumstancia alguna, se publicaran sus nombres.

Carlow Lay College
AND
ST. MARY'S PREPARATORY SCHOOL
Knockbeg, Queen's County.

In Carlow Lay College students are prepared for the Army, for the various professions, and for Degrees in Arts in the University of London.

Amongst Catholic Colleges, Carlow ranks next to Ushaw and Stoneyhurst in the number of her students who are graduates and undergraduates of the London University. An Examiner from the University of London holds Examinations in Carlow College, to confer Degrees in Arts.

There is a special class under a competent master to prepare students for commercial life, and no exertion is spared to secure the progress of the pupils in the junior classes.

The College is healthfully situated in a park of six acres, which forms extensive recreation grounds for the students.

TERMS:

Pension, including all extras, 35 guineas per annum.

Pension, exclusive of extras, 30 guineas.

St. Mary's Preparatory School

In connection with Carlow Lay College, the Preparatory School of St. Mary's, for Children from eight to twelve years of age, has been re-opened.

Rector—Rev. William P Bourke.

Matron and Professor of French and Music—Miss Finneran.

English Master—Mr P Harnett.

The School is strictly and purposely limited to children of such age, in order that they may be totally separated from the grown boys, and may have all the advantages of minute attention which their tender years require.

The children at St. Mary's are under the special care of the matron, and the rector takes charge of their religious instruction.

TERMS:

Pension, including all extras, 35 guineas per annum.

Pension, exclusive of extras, £30.
